Client: European Union

European Film Festival

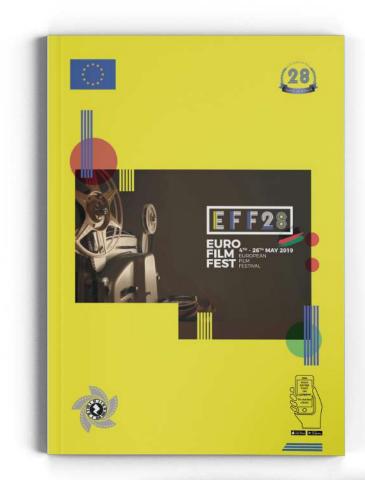

The annual European Film Festival is an event that provides a window into the diversity of people living in Europe. While the festival features films from Europe, it also promotes Kenyan talent by showcasing movies shot and produced by Kenyans. For the 2019 annual EFF, we were commissioned to come up with the festival's visual identity design.

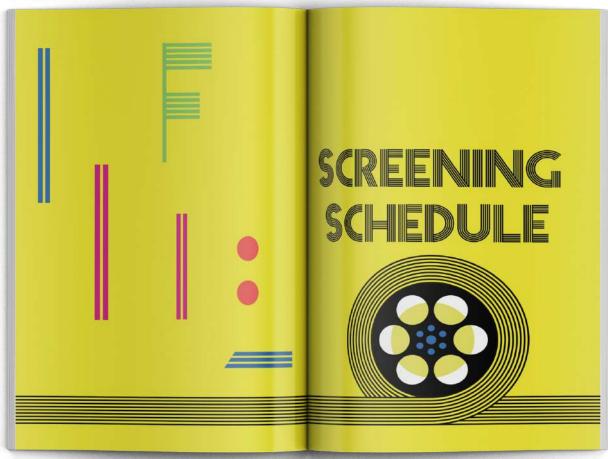

Services offered:

Visual Identity Design - Event Logo & Poster, Catalogue, Social media artworks and Photography.

Curator: Nyambura Waruingi AR Developers: BlackRhino VR

Client: Goethe-Institut

NOMA! XR Exhibition

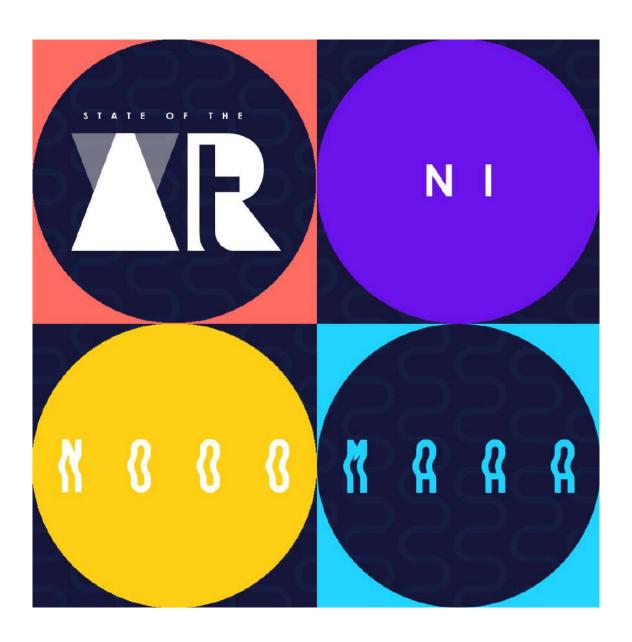

State of the ARt is a project that aims to integrate visual art with AR & VR, and bring art to life in various collaborative exhibitions.

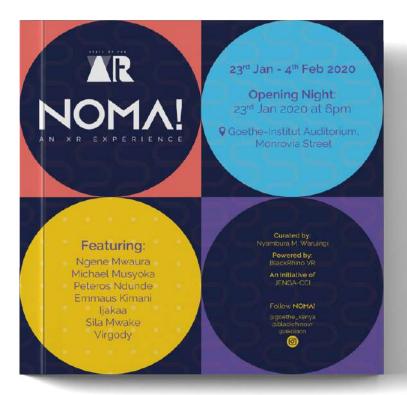

The first exhibition of the project dubbed 'NOMA!' brought together visual artists to showcase their work using AR/VR technologies. The artists partnered with XR Developers to immerse the audience into their artistic world.

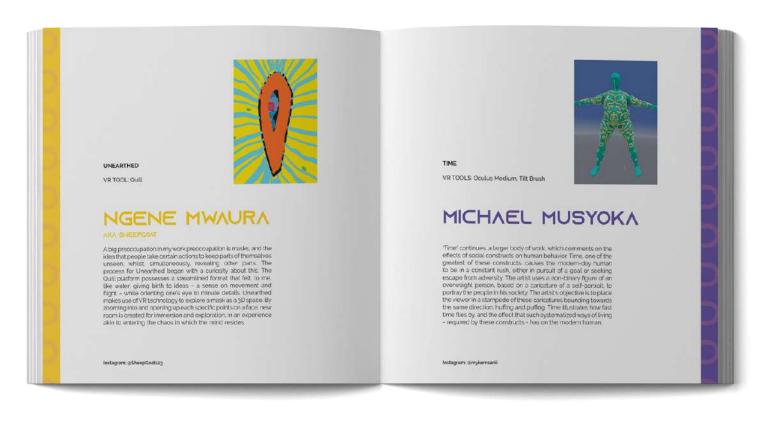

Services offered:

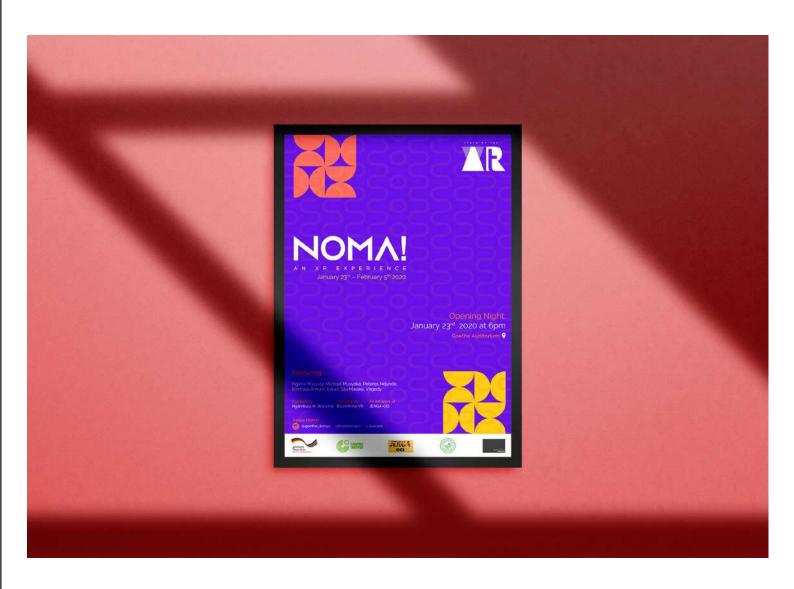

Visual Identity Design - Event Logo & Poster, Artist and Partner profiles, Brochure, UI elements, Playing cards, Social media artworks and Photography.

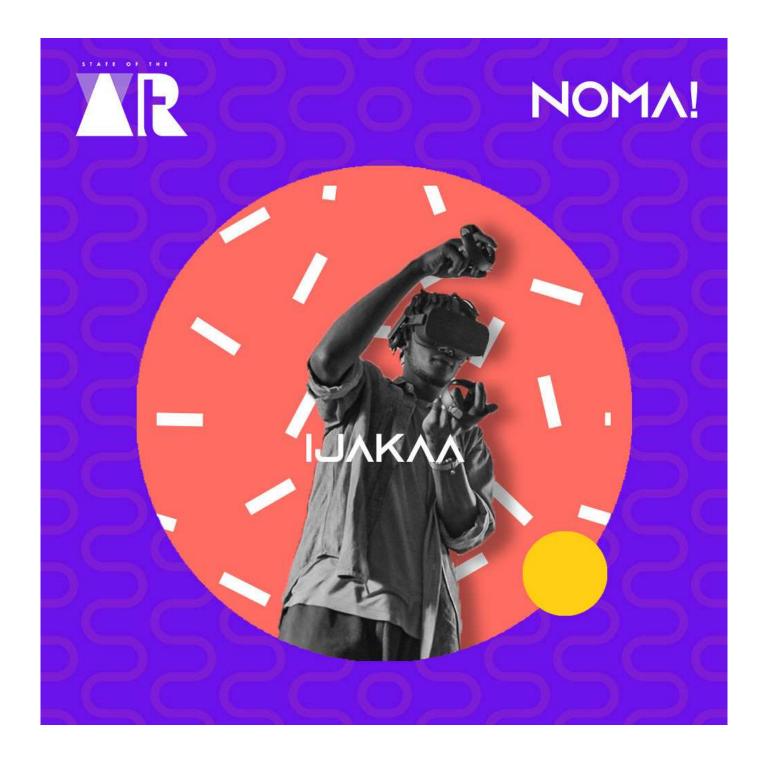

Curator: Nyambura Waruingi XR Developers: BlackRhino VR

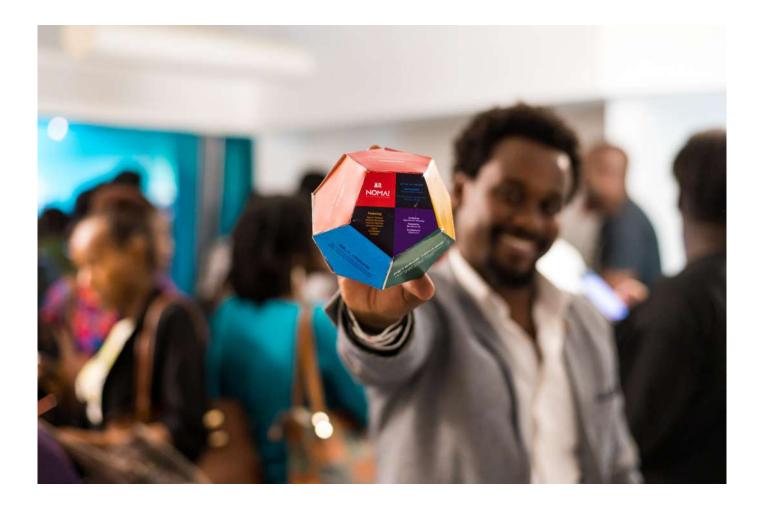

Client: Mayfair Bank

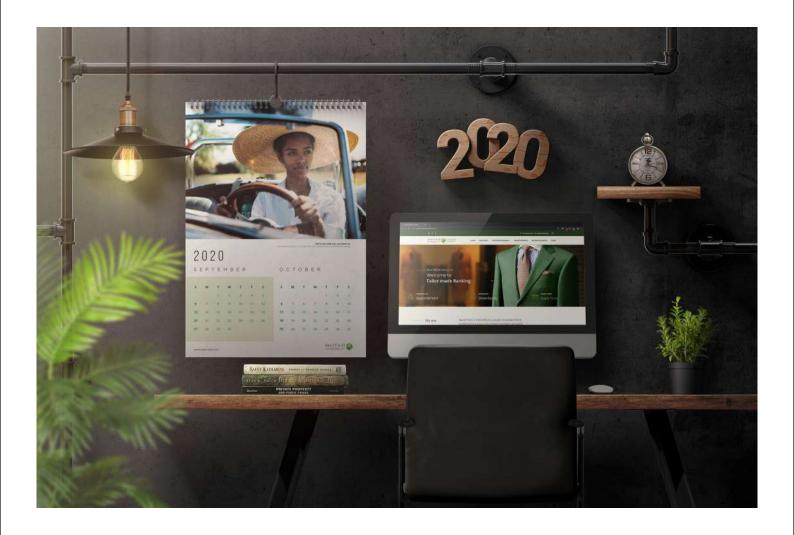

Mayfair Bank Branding

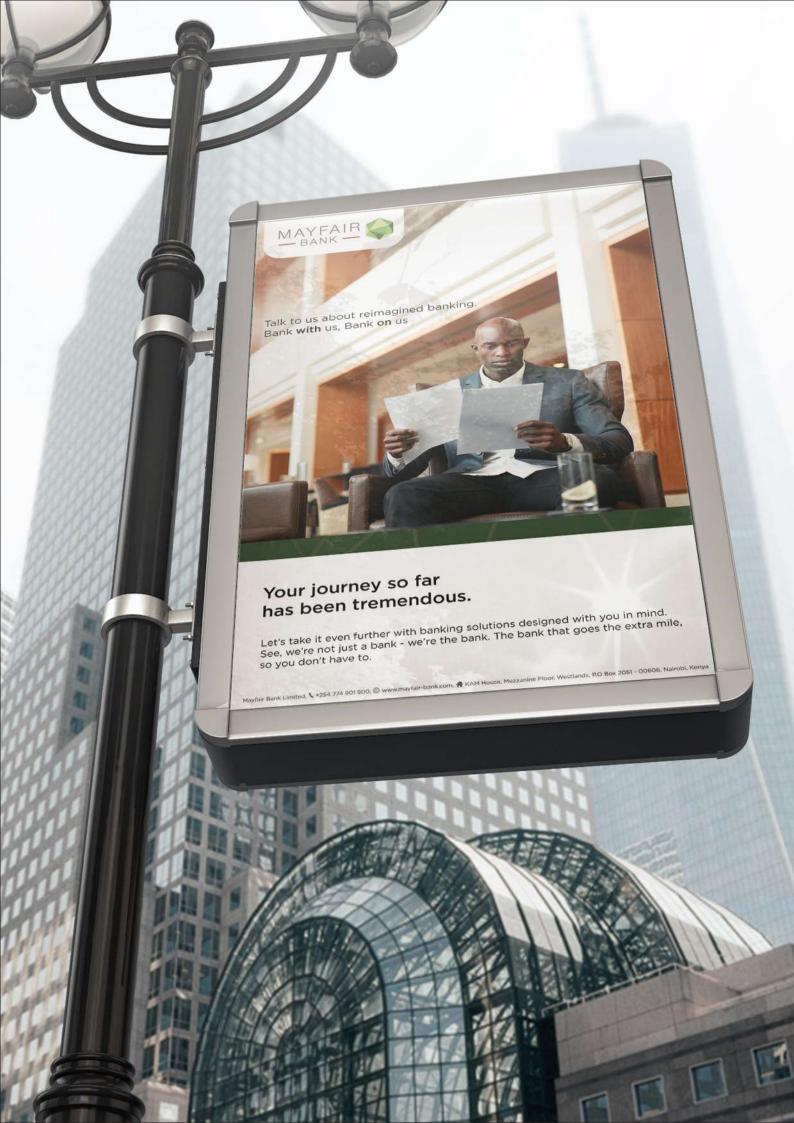

For this project, we were commissioned to come up with a visual identity design for the Mayfair Bank in Nairobi, using their existing logo.

Services offered:

Visual Identity Design - Company collateral.

Client: Baringo County Government

Kirandich Water Dam Road Race

The Kirdam Road Race is a community fundraising initiative that aims to boost the provision of clean, piped water to Baringo Central constituency residents through the purchase of water pipes, piping and the construction of water tanks.

Services offered:

Event Logo, Poster & Brochure

RACE OBJECTIVE

The Kirdam Road Race is a community fundraising initiative that aims to boost the provision of clean, piped water to Baringo Central constituency residents through the purchase of water pipes, piping and the construction of water tanks. This is part of the realization of the 2030 MDGs by providing residents with clean and accessible water in efforts to eradicate extreme poverty and hunger. The road race is an initiative of Baringo Central Constituency residents in conjunction with Baringo Central MP Joshua Kandie that also aims to promote sport, healthy lifestyles and tourism through an healthy fun-run around the scenic Kirandich Dam terrain, neighboring forests and adjacent hills in a relaxed, competetive social and family outing.

Sports has incredible power to unite individuals and through this event, we would encourage the adoption of sports in Baringo County as a worthwhile social endeavor that also comes with innumerable health benefits

It is envisioned that in conjunction with the Baringo County government, the local leadership will improve the quality of life of the people of Baringo Central Constituency through the supply of water to at least 80 per cent of the homesteads in the next few years as opposed to the current 49 percent who access clean, piped water as well as improve the forest cover by encouraging residents to plant as many trees as possible.

TALENT SEARCH

Kenya is a sporting nation and sports has often times been used to maintain and improve physical ability and skills through nurturing sporting talent as well as providing enjoyment to both participants and spectators. In this light, the organizing committee settled on using athletics as the driving force for this initiative since communities from the region are passionate and committed towards athletics and pride themselves on the success stories of veteran athletes such as Paul Tergat, the current Chairman, National Olympic Committee – Kenya (NOCK). It is our hope that through Kirdam Road Race, participants will become part of an annual powerful social activity to promote health, nurture young talent and foster the personal development of athletes. We also believe that established talent, local enthusiasts and young athletes will use the event to train and prepare themselves for other upcoming road races that promote the Olympic spirit.

BACKGROUND

Acces to safe, clean, drinking water is a valid dream for every citizen in a developing country like Kenya. The provision of clean, accessible water features as a crucial foundation of Vision 2030 and the Millenium Development Goal No. 7 as adopted by the Kenya Government. However, Baringo Central Constituency, within the larger Baringo County is one area that still experiences water shortages many years after independence. Water shortages has hampered development, affected health standards among locals and most times leaving residents (mainly women and girls) to spend many hours a day searching for water. These wasted hours could have been spent in schooling, childcare or engaging in other meaningful/ income generating activities.

It is with the noble objective of improving the health and general welfare of local residents through providing clean, piped water that Kirandich Water Dam was established. Kirandich Water dam (Kirdam) situated in the county headquarters, Kabarnet town, is a high capacity project aimed at providing water for a big part of Baringo County. Kirdam was commissioned by former area MP and retired President Daniel arap Moi in 2001 was funded by an Italian Government Grant and is currently managed by the Rift Valley Water Services Board (RVWSB). Kirandich Water Supply Phase II is an extension of the first phase, which involved construction of the dam, a water treatment plant, two pumping stations and related rising mains, two water tanks and a distribution pipeline. The second phase has been in the offing for some time now and work is set to resume soon. Kirdam Phase Two will upgrade the supply of water to Kabarnet town and also expand water supply to Kabartonjo town and its environs in the Baringo North Sub-County.

In as much as the Italian government had released a Ksh1.8 billion Ioan in 2017 to finance Phase II of the water project that was to include the extension of pipelines to the un-serviced areas of Kabarnet town, Kabasis, Kapsoo and Kituro, a lot needs to be done to ensure the water is well distributed to cover a big part of the constituency. In this second phase, the project is expected to distribute water to a population of close to 65,000, as compared to the current 12,000. The project design includes the construction of a sewerage system and waste management for Kabarnet, a town that currently has more than 30,000 inhabitants.
